***Response to Arguments***

Applicant's arguments filed February 15, 2006 have been fully considered but they are not persuasive.

The new limitations entered in claims 40, 46, 48 and 65 have been considered and entered. However, the limitations entered in the claims are just functional language. Expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App. 1969).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24-26, 29, 31-34, 40-43, 46-53, 62, 65 and 66 are rejected under 35 U.S.C. 102(e) as being anticipated by Schafer et al US Patent Pub. 2004/0172129 A1.

Schafer et al discloses intervertebral implant comprising a first tubular body (34, 18 & 36), a plurality of endplates (16 & 14) having an end surface and a tubular portion and a basket (42). The basket, the endplates and the tubular body are capable of receiving graft material between the holes (see paragraphs 16 and 39).

Claims 40-44, 65 and 67 are rejected under 35 U.S.C. 102(b) as being anticipated by Malone US Patent Pub. 2002/0169507 A1.

Malone discloses a graft containment device comprising a sidewall (148) circumscribing a base (152), an open end (see Fig. 7) opposite the base and an engagement device (120). Regarding claims 42 & 43, see Fig. 7.

Claims 46-53 are rejected under 35 U.S.C. 102(e) as being anticipated by Kojimoto et al US Patent 5,290,312.

Kojimoto et al discloses a tubular assembly (20) having a sidewall (40) and a graft containment device (18) comprising an open end (32) and a perforated base plate (56).

Regarding claims 47-53, see Fig. 2.

#### *Response to Arguments*

Applicant's arguments with respect to claims 24-34, 40-44, 46-53, 55 and 62-67 have been considered but are moot in view of the new ground(s) of rejection.

#### *Allowable Subject Matter*

Claims 27, 28, 30 and 63 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### *Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
